EXPERIENCE

Blueve Tech | Full Stack Developer Intern (1April–30June 2026)

- **End-to-End Development:** Spearheaded the design and development of scalable full-stack applications using modern web technologies (**React.js**, **Node.js**), ensuring high performance and fault tolerance.
- **Backend Architecture & Optimization:** Architected secure **RESTful APIs** and optimized database schemas, reducing query latency by 20% and significantly improving overall system efficiency.
- **Code Quality & Best Practices:** Enforced clean code architecture and implemented **CI/CD workflows**, which streamlined the deployment process and minimized production bugs.
- **Cross-Functional Collaboration:** Partnered closely with product and design teams to translate complex business requirements into robust, scalable, and user-centric technical solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python, SQL, C.
- **Frameworks & Technologies:** React.js, Node.js, Express.js, **Redux Toolkit**, RESTful APIs, WebSockets
- **Databases & Queues:** MySQL, MongoDB, ..
- **Cloud & Infrastructure:** Docker, Kubernetes (Basics), **AWS**, **Cloudinary**, CI/CD pipelines.
- **AI & Productivity:** GitHub Copilot, Cursor IDE, Prompt Engineering (for rapid development, debugging & code optimization), **OpenAI API**, LangChain.
- **Tools & version Control:** Git, GitHub, Postman, Vercel, **Render**, VS Code,
- **Testing & Code Quality:** Jest, Playwright (ya Cypress), ESLint, Prettier.
- **Monitoring & Logging:** Sentry (Error Tracking), Winston/Morgan (Logging), PostHog (Analytics).

PROJECTS

AI Conversational Assistant (LLM-based Chat System)

- **Engineered** a low-latency, context-aware chat system leveraging **OpenAI API** & advanced prompt engineering for high-accuracy, real-time responses.
- **Architected** scalable **REST APIs** (Node.js/Express) to manage concurrent queries, conversational memory, and future **RAG** integrations.

Live / Code: [GitHub Repository](#) | [Live Demo](#)

Wanderlust – Full-Stack Travel Accommodation Platform | [MERN Stack]

- **Developed** a comprehensive full-stack property marketplace using the **MERN Stack**.
- **Implemented** robust, role-based user **authentication** and security pipelines utilizing **JWT** and bcrypt for secure login and data protection.
- **Optimized** media handling by integrating **Cloudinar** for fast, dynamic image uploads and optimized database schemas in **MongoDB** for complex listing queries. **Live / Code:** [GitHub Repository](#) | [Live Demo](#)

EDUCATION

B.Tech in Computer Engineering | IEC College of Engineering and Technology, Greater Noida *Currently in 3rd Year* | *Expected Graduation: 2027*

ACHIEVEMENTS & COMMUNITY

- ☑ **Problem Solving:** Solved 90+ DSA challenges on LeetCode using **Java**, focusing on core algorithmic logic
- ☑ **Community & Open Source:** Active member at **Google Developer Groups (GDG)** On IEC College, collaborating on tech events.
- ☑ **Certifications:** Completed professional coursework in Full-Stack Web Development and DSA with Java via [Platform Name].
